

Livestock insurance is a niche area, requiring expertise in a wide range of risks. At Hispania, Livestock insurance is underwritten by an experienced underwriting team with an excellent reputation in the London Market, providing excellent quality of service and underwriting knowledge.

Our Lloyd's backed facility allows us to offer the following coverages:

- » All Risks Mortality: Gives coverage for death of animals resulting from accident, illness, injury, humane destruction or disease.
- » Restricted Perils: Offers coverage for death of animals due to perils named in the policy wording. This is generally bought in relation to covering a herd or multiple animals.
- » Transit endorsements and disease extensions: Offers extensions of coverage to the restricted perils to protect animals from disease and whilst being transported.
- » Environmental Liability: Environmental liability insurance (ELI) covers the cost of repairing environmental damage arising from both common law claims, and claims arising from UK and EU legislation.
- » Trading cut offs: National and International organizations could unexpectedly stop trading and close the borders due to different reasons and a company's P&L could be severely affected.

We have provided cover for the following species and have the ability to provide USD 50,000,000 in capacity if needed on a direct or reinsurance basis with the above coverages:

- » Cattle and Sheep Farms
- » Poultry Farms
- » Zoo and Exotic Animals
- » Swine Farms
- » Marine and Aquatic animals

Our minimum premium for livestock risks is GBP 300
